## SEO

In the field of digital marketing and corporate communication, sponsored posts have become an essential tool for enhancing the visibility of businesses, political parties, institutions, and brands. In Catalonia, one of the top-indexed platforms on Google, Gironanoticias.com, offers this service with dofollow links, in collaboration with Grupo GN and Grupo 24 Horas, two of the leading digital media networks in the Spanish-speaking world.

A sponsored post is an article published in trusted media outlets that presents products, services, or projects from a positive, natural, and non-intrusive perspective. These articles typically include strategic links that direct readers to the advertiser's website, improving SEO performance, generating qualified traffic, and strengthening the client's digital authority.

Key benefits of sponsored posts:

Greater visibility among targeted audiences

Increased qualified traffic through effective link-building strategies

Enhanced credibility when published in established media outlets

Improved SEO through dofollow links in niche-relevant content

Permanent publication, with no expiration date on the internet
